

DRA. IRIS FAULL

SYNLAB · GLOBAL

Summary

Passionate physician working in the field of diagnostics over 20 years. With main focus on precision medicine and oncology, I have held medical and business development positions in Europe, South America, Canada and Middle East.

My mission is to bring innovative diagnostic tools into practice, demonstrate their clinical utility in the real world environment, and work with clinicians, scientists, patients, and healthcare payers to improve disease management, outcomes, and quality of life. I have successfully achieved reimbursement wins, guideline adoption, and evidence generation for diagnostic tests in cancer in several markets, and established innovative partnerships with leading hospitals and research societies. Learning every day from customers and colleagues, I am passionate about advancing healthcare globally.
